Example. The press template has trim, bleed and safe area drawn in; design on top and hide the guide layer.

01 / Extend your background.

Allow $\frac{1}{8}$ " **bleed beyond each trimmed edge**. Continue background colors and images into the bleed to help avoid white edges after cutting. Your full canvas is 3.75" × 2.25".

02 / Protect the important details.

Keep text and logos $\frac{1}{8}$ " **inside the trim**.

03 / Corners come off at $\frac{1}{4}$ ".

All four corners are cut to a $\frac{1}{4}$ " radius after printing. Keep logos and text out of the corners as well as inside the safe area, and let backgrounds run right through them.

Before you send it

- My page is 3.75" × 2.25", including bleed.
- My images are 300 dpi at their full printed size.
- My artwork is in CMYK, ready for print.
- Text and logos are $\frac{1}{8}$ " inside the trim and clear of the corners.
- I've hidden guide layers and exported both sides as one full-size PDF.

Your proof first. Your approval before print.

Your PDF proof arrives by email; check content and positioning. Screen color may differ from print. A hard-copy proof is available on request. Production starts after approval.
